

Lesson 5b Divide by 2-digit Numbers Continued

Objective: Divide by a 2-digit number and estimate to place the first digit in the quotient.

Complete on a separate sheet of paper and turn in to the basket.

Warm-up: Divide. Check your answers.

1. $39 \overline{)918}$

2. $17 \overline{)624}$

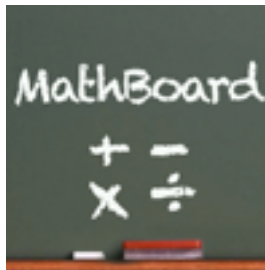

3. $92 \overline{)458}$

4. $43 \overline{)849}$
