

Lesson 5f: Interpret the Remainder

Objective: Solve problems involving remainders

Complete on a separate sheet of paper and turn in to the basket.

Warm-up: Divide and check.

1. $5\overline{)4,045}$
2. $8\overline{)48,603}$
3. $8\overline{)725}$
4. $7\overline{)725}$
5. $7\overline{)45,504}$

Think about it:

Use a division algorithm to solve the problem. Tell what the remainder represents. Decide what to do with the remainder.

3 possibilities with the remainder to answer a word problem question

1. Ignore it
2. Report it as a fraction or decimal
3. Round the answer up.

App on the iPad: Name that Number

Homework: Interpret remainders (HW 5.7)
