

Lesson 9b: Prime Factorization

Objective: Write the Prime Factorization of a number

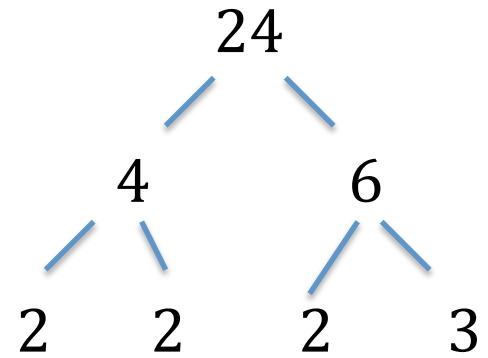

Complete on a separate sheet of paper and turn in to the basket.

Warm-up: Write all of the factors for each number in a rainbow list. Then identify the number as a prime number or composite number.

1. 18
2. 19
3. 20
4. 21

Learn About It:

Prime factorization – is a number written as all of its prime factors.

$$2^3 \times 3$$
