

Lesson 10g: Problem Solving: Draw a diagram

Objective: Use a diagram to solve problems

Complete on a separate piece of paper and turn in to the basket.

Warm-up: Subtract. Write the difference in simplest form.

1. $5\frac{1}{3} - 3\frac{1}{6} =$

2. $8\frac{1}{4} - 5\frac{1}{2} =$

3. $6\frac{2}{8} - 1\frac{3}{12} =$

4. $7\frac{2}{3} - 3\frac{7}{8} =$

Learn About It:

1. This is what you know
2. Draw a diagram (picture)
3. Look back at the problem. Is the answer reasonable?
