

# Lesson 12b: Multiplication of Fractions

**Objective: Find the product of two fractions**

Complete on a separate piece of paper and turn in to the basket.

**Warm-up:** Use a model to find each product.

1.  $\frac{3}{4} \times \frac{2}{5} =$

2.  $\frac{2}{3} \times \frac{3}{4} =$

3.  $2 \times \frac{1}{3} =$

**Learn About It:**

- **Way 1**
  - **Multiply the numerators**
  - **Multiply the denominators**
  - **Simplify**
- **Way 2**
  - **Simplify first**
  - **Multiply numerators**
  - **Multiply denominators**
- **Whole numbers place over 1 example  $12 = \frac{12}{1}$**
