

Lesson 14c: Divide a decimal adding zeros in the dividend.

Objective: Write one or more zeros in the dividend to help solve division problems.

Complete on a separate sheet of paper and turn in to the basket.

Warm-up:

1. $7\overline{)8.4}$

2. $6\overline{)5.4}$

3. $3\overline{)34.2}$

4. $11\overline{)78.1}$

5. $6\overline{)10.8}$

Learn About It:

1. Divide as though the dividend were a whole number
2. You cannot have a remainder with decimal division. To continue add one or more zeros to solve.
3. Place a decimal point in the quotient directly above the decimal point in the dividend.
