

Lesson 15b: Measure, Draw, and classify Angles

Objective: Measure, draw, and classify angles.

Warm-up: Greg makes the Grade Worksheet

Learn About It:

1. Angle – formed by two rays with the same endpoint. Symbol is \angle
2. Vertex – common endpoint.
3. Degrees – angles are measured in degrees
4. Protractor – tool used to measure angles
5. Right angle – equal to 90°
6. acute angle – is greater than 0° and less than 90°
7. obtuse angle – greater than 90° and less than 180°
8. straight angle – equal to 180°

angles ppt

Practice 15.2

Homework: 15.2

App of the Day:

Itooch – geometry

- 1– review, angles, polygons, circles

that quiz math –

- geometry
- angles
- measure
 - length 20
 - level 3 -8

geometry4 kids

- learn angles and rays
- practice angles and rays

Math Drills
