

# Lesson 15d: Rotations, Reflections, and Translations

**Objective:** Identify and model translations, rotations, and reflections.

Complete in your journal.

**Warm-up:** Math Minute.

**Learn About It:**

Transformations: changes the position, but not the shape of a plane figure.

1. Reflection – figure flips over a line
2. Rotation – figure turns about a point
3. Translation – figure slides a given distance in a given direction
