

Lesson 15e: Circles

Objective: Identify parts of a circle.

Complete on a separate sheet of paper and turn in to the basket.

Warm-up: Complete #'s 1-6 of Reteach 15.6

Learn About It:

Circle: the set of points in a plane that are the same distance from any given point.

1. Center – a point that is the same distance from all points on a circle.
2. Radius – segment that connects the center of a circle to any point on the circle.
3. Diameter – a segment that connects two points on the circle and passes through the center of the circle.
4. Chord – any segment that connects two points on the circle. A diameter is a special kind of chord.
5. Central angle – an angle with its vertex at the center of the circle.
