

Lesson 16C: Area of Triangles

Objective: Find and use the formula to find the area of a triangle.

Complete in your journal.

Warm-up: Math Minute

Learn About It:

1. Draw 2 congruent triangles
2. Cut out the triangles
3. Place the 2 triangles you drew next to each other to make a parallelogram.
4. What is the area of a parallelogram? ($b \times h$)
5. Each triangle represents $\frac{1}{2}$ of the parallelogram.
6. The area of a triangle is $\frac{1}{2} \times b \times h$

Brainpop: area of polygons

area of a triangle ppt

Practice 16.4

Homework: 16.4

App of the Day:

Symmetry shuffle

- Itooch – geometry #6
- Thatquiz math -
 - Geometry (perimeter, area, and volume)
 - Length (20), level 10
 - Area and perimeter of rectangle and triangle.
