

ESCAPE ROOM

READING PRACTICE

Station 2

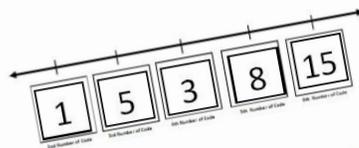

- 1) Read the paragraph "Fossil Mishap."
- 2) Decide how it is organized and choose the text structure that matches.
- 3) Choose the cards that complete the text structure and put them in the appropriate place.
- 4) Put your answers in the recording sheet. The first number of the code is the number of the text structure you chose.

EXAMPLE

Code 1 = 7

Recording Sheet	
1st Number	Remainder of code from cards put into
7	153815

Code = 7153158

Station 2

Fossil Mishap

It is important to think critically about the information that you receive, or you may be led astray. For example, the brontosaurus is a type of dinosaur that never really existed. Many people still believe in the brontosaurus today, but the "brontosaurus" is actually the body of an dinosaur with the head of a camarasaurus. This concocted creature was made from two mismatched fossils. Had more people thought critically about these findings, analyzing the components that were mismatched, entire generations of school children may not have been misled; therefore, think critically about the information that people provide, even if it's information you find on a book or in a newspaper. Keep these problems in mind when conducting your studies.

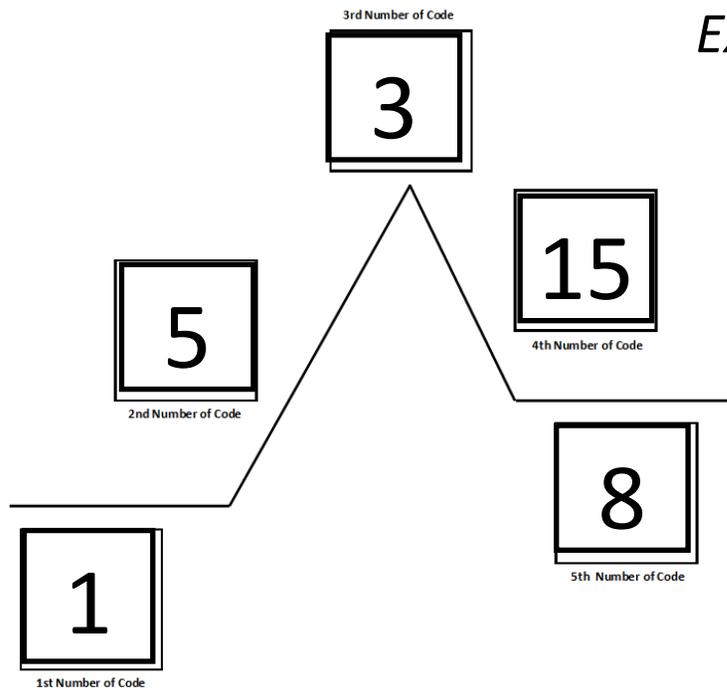

Teacher Instructions

- 1) Print and provide 1 copy of the station directions at each station.**
- 2) Print and cut apart the pages that say “print and cut apart” on them. It would be best if you print them on cardstock. You might want to have several sets in Ziploc bags at each station. Put them at the correct station as labeled on the corner of each page.**
- 3) Print several copies of the main page (Plot Diagram for Station 1, 3 pages of text structures for Station 2, Matching Terms for Station 3, and Context Clues for Station 4) and supply them at each station.**
- 4) For station 1 and 3 you will need to go to the link provided to print and provide several copies of the text for those stations.**
- 5) Give each student a recording sheet.**
- 6) The easiest way to have your students complete the Escape Room is to have them complete their answer key before allowing them on technology. I divide them into even groups across the 4 stations. They then move at their own pace around the stations until they have completed their entire answer key. At that time, they may go to the google form and attempt to escape.**
- 7) I do not have a timer for this Escape Room. I just have it be a race among the students. The link to the Google Form is below. You can share it on Google Classroom or write the link on the board for the students to enter on their own.**

Station 1

- 1) Read the story "Thank You, Ma'am" by Langston Hughes.
- 2) After reading, put the parts of the plot diagram in the correct spot on the "Plot Diagram" sheet. This will create your code.
- 3) Write your code down on your recording sheet and move onto the next station.

EXAMPLE

Recording Sheet

1st Number	2nd Number	3rd Number	4th Number	5th Number
1	5	3	15	8

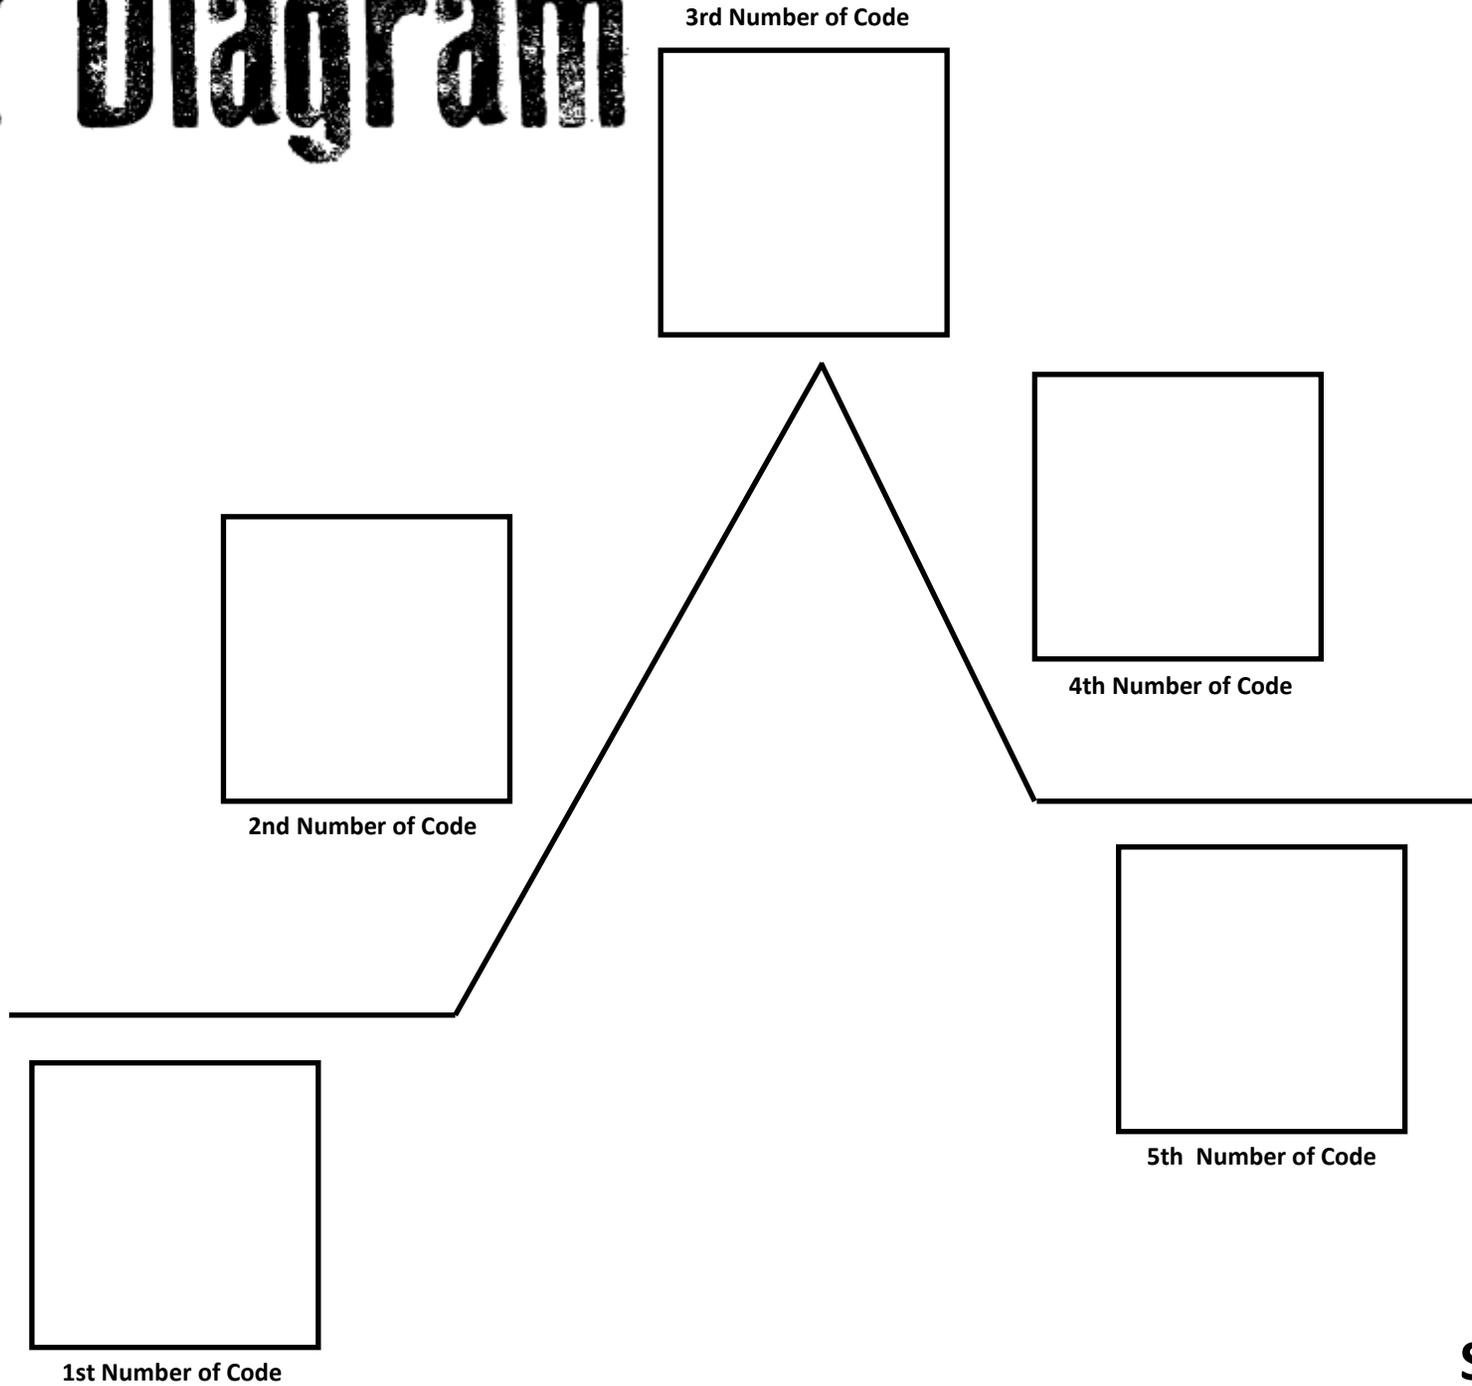

Code = 153158
